

## Share the Beauty of Our Rivers

The Sudbury, Assabet and Concord Rivers are beautiful rivers. As you boat, hike, walk, cycle or even sit by them, you will find many special places!

### Activity 1:

Explore our watershed and rivers. Find a place that has particular interest to you! Draw or paint a picture that describes the special place.

If you are not near a river, use your imagination. Draw or paint a picture of the river you are thinking of!

Share a photo of your picture with us!

### Activity 2:

As you explore our streams and rivers, do your part in protecting these areas! Practice "Leave No Trace" (LNT). Take only pictures and leave only footprints.

Draw or describe what you think the river would look like if the situation below were true.

If each visitor took one rock from the river, what would happen if we had 1,000 visitors?

If each visitor picked one flower, what would the river look like after 1,000 people came to the rivers?

If everyone made their own path, what would the banks look like after 1,000 hikers walked along them?

If everyone threw their trash on the ground, what would our rivers look like after 1,000 visitors?
